

10-96

PART # CS2391-2

# **CAUTION !!**

---

Before installing your new Dodge Sport Springs, you must take note that the **LEFT AND RIGHT SPRINGS ARE DIFFERENT!!**

One spring has more coils than the other and it is very important you install it correctly. As you compare the springs you will notice that one spring has a little more than 7 (seven) coils and the other about 6 (six) coils. Now that you have determined the spring with more coils (7) you will install that spring on the passenger side. Be sure you use the rubber spring pad, from the stock coil, on the top of the new spring.
