QUAD ROW FLEXIBLE LED REAR LIGHT

Thank you for choosing Rough Country for all your lighting needs.

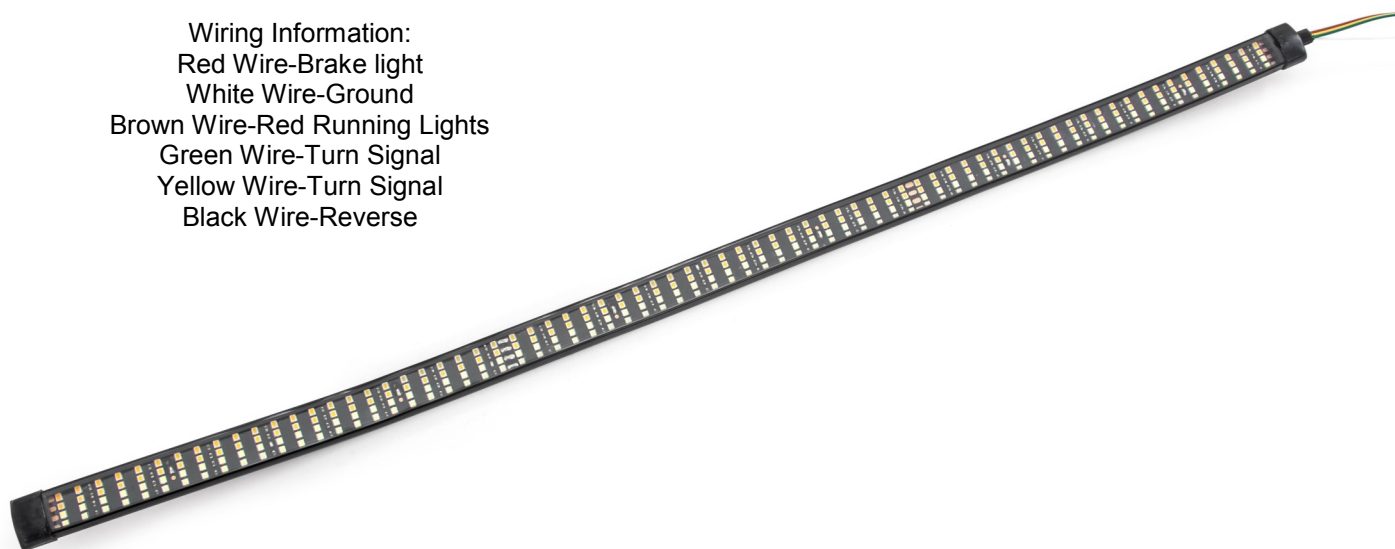

⚠ WARNING Please read instructions before beginning installation. This flexible quad row light does require the light to be hardwired into the appropriate factory wires to ensure correct operation of the light bar functions. If you are not familiar with the factory harness and the function of those individual wires do not attempt to install this light yourself. Please take to a qualified installation professional that will ensure a trouble free and correct installation.

⚠ WARNING Light bar must be installed at 60 degrees or higher , if the temperature is lower a heat gun should be used to ensure proper adhesion.

INSTALLATION INSTRUCTIONS

1. Thoroughly clean the mounting surface, use warm soapy water first to remove all wax and dirt. Then dry and use a cleaner such as rubbing alcohol to clean the surface. Once clean do not touch.
2. Measure across the mounting surface and place a piece of tape marking the center. Next measure the light bar and mark center with a piece of tape.
3. Place the light bar in the mounting location and mark each end with a piece of tape under the light bar when you have it centered up and down.
4. Make sure the wire end of the light bar is to the driver side and peel off the adhesive tape backing in. Place the light bar in the desired location and align with the tape markings. Lightly press on the light, you may have to adjust the position of the light bar. When the position of the light bar is correct firmly press down on the adhesive tape.
5. Use tie wraps to hold the wire bundle up and out of the way. Connect the corresponding wires to the desired functions on the vehicle.
6. Locate and wire the light into the appropriate wires to ensure correct function.
7. Test the light by checking to make sure all turn signals and stop signals work as they should.
8. Make sure all wires are secure, and not hanging down in harms way.
